## CAREER VIDEOS

- x Career Video – People who work within various careers discuss the following information:
1. Describe your typical day
  2. What requirements are there for working in this career?
  3. Best/worst parts of the job
  4. Any final advice for someone considering this line of work?

#### How Can Professors/Teachers Utilize This Information?

Professors and teachers of any level can visit [www.drkit.org/teachers](http://www.drkit.org/teachers) to find sample assignments and links to various categories of videos. In addition, the two pages that follow are one-page handouts that can be distributed to students. These explain how information on the site may be used by various populations including:

- Students working on a degree in psychology (undergraduate or graduate)
- Undergraduate college students (or high school students) considering a psychology-related major or students who aren't sure which career field to pursue.

## Resources for Students Working on an Undergraduate Degree in Psychology

Students who are already working on a psychology-related undergraduate degree may find the following resources helpful to explore potential careers as well as potential graduate programs. These students should view the following pages:

-[www.drkit.org/psychology](http://www.drkit.org/psychology) This is the best page for students interested in psychology to bookmark because it directs users to the various resources on the site.

-View Advice from Professor videos to learn about graduate programs in the field

-View Advice from Student videos to get other students' perspectives on graduate programs

-View Career Videos for descriptions of careers from people who actually work in these careers
