

A form area enclosed in a dark green border, containing three circular icons in a column on the left and two horizontal input fields on the right. The icons are: a smiley face, an envelope, and a rectangular box with a dashed line. The input fields are blue lines.

the 1990s, the number of people with a diagnosis of schizophrenia has increased in many countries (1).

There is a growing awareness of the need to improve the quality of life of people with schizophrenia. The World Health Organization (WHO) has developed a number of instruments to measure the quality of life of people with schizophrenia (2). The WHO Quality of Life Scale (WHOQOL) is one of the most widely used instruments (3).

The WHOQOL is a self-rated questionnaire that assesses the quality of life of people with schizophrenia. It consists of 26 items that are grouped into six domains: physical health, psychological health, social relationships, family, environment, and spirituality.

The WHOQOL is a valid and reliable instrument for measuring the quality of life of people with schizophrenia (4). It has been used in a number of studies to assess the quality of life of people with schizophrenia (5, 6).

The purpose of this study was to assess the quality of life of people with schizophrenia in a community setting in a developing country.
